

Functional Requirements Document (FRD)

Project Name: BAHub Workspace Suite
Document Version: 1.0
Status: APPROVED
Target Audience: Frontend & Backend Engineers, QA Testers, Product Managers
Date: July 2, 2026

Version History

Version	Date	Author	Description of Changes
0.1	June 18, 2026	Devon Miller (Lead BA)	Initial Draft of Functional specs.
1.0	July 02, 2026	Devon Miller (Lead BA)	Baseline finalized for implementation.

1. Product Overview

The BAHub platform provides an interactive, visual workspace designed specifically to streamline Business Analyst operational flows. It translates strategic objectives into structured, synchronized engineering tasks.

2. Detailed Functional Specifications

2.1 Workspace Authentication & Session Auditing

- ID:** FUNC-001
- Description:** Users must authenticate using a JWT-based protocol. The system must track active login sessions (`UserSession` model), recording IP address, browser user-agent, device metadata, and last activity timestamp.

- **UX/UI Interaction:**
 - Login screen featuring username/password validations.
 - Profile session management panel showing active logins with the option to revoke sessions.
- **Exceptions:** Authentication failure returns a standardized 401 Unauthorized JSON envelope.

2.2 Project Scoping & Member RBAC

- **ID:** FUNC - 002
- **Description:** Establish multi-tenant scoping. A user can only view projects inside their assigned Organization . Standard project access is limited by ProjectMember roles (Project Manager, Contributor, Viewer).
- **UX/UI Interaction:**
 - Project switching sidebar dropdown.
 - Projects dashboard displaying active listings and team rosters.

2.3 Stakeholder Power/Interest Matrix Grid

- **ID:** FUNC - 003
- **Description:** Allow registering stakeholders with properties for Name, Title, Department, Power (High/Low), and Interest (High/Low). Automatically position registered stakeholders on a visual 2x2 grid.
- **UX/UI Interaction:**
 - A form to register/edit stakeholders.
 - An interactive 2x2 grid rendering stakeholder cards in four quadrants: *Manage Closely*, *Keep Satisfied*, *Keep Informed*, *Monitor*.

2.4 Notion-Style Requirements Split Grid Editor

- **ID:** FUNC - 004
- **Description:** A dual-pane split-screen view. The left pane lists project requirements in a grid format, and the right pane displays the active requirement's detailed properties. Auto-generate sequential, project-scoped requirement IDs in the format REQ-### .
- **Fields:** Title, Description, Requirement Type (Functional, Non-Functional, Technical, UI), Status (Draft, In Review, Approved, Rejected), Priority (High, Medium, Low), and Source Stakeholder.

- **UX/UI Interaction:**
 - Clicking a row in the left-hand table updates the details view in the right-hand panel without reloading the page.
 - Inline dropdowns for quick updates to priority, type, and status.

2.5 Agile Backlog Board & User Story Module

- **ID:** FUNC - 005
- **Description:** Support decomposing approved requirements into User Stories. Each story must link to a parent requirement, follow the standard template (*As a... I want to... So that...*), and feature an acceptance criteria text field.
- **Estimation Points:** Fibonacci scale options: 1, 2, 3, 5, 8, 13 points.
- **Kanban Workflow States:** cards reside in one of four states: *To Do*, *In Progress*, *Ready for QA*, or *Done*.
- **UX/UI Interaction:**
 - Drag-and-drop board allowing users to move story cards between status lanes.

2.6 SWOT Matrix Quadrant Configurator

- **ID:** FUNC - 006
- **Description:** Support strategic analysis by offering a quadrant interface for SWOT mapping.
- **UX/UI Interaction:**
 - A 2x2 grid representing Strengths, Weaknesses, Opportunities, and Threats. Text inputs auto-save changes.

2.7 Gap Analysis Tracker

- **ID:** FUNC - 007
- **Description:** Log process improvement steps.
- **Fields:** Title, Current State, Future State, Gap Description, Action Plan, and Status (Identified, In Progress, Resolved).
- **UX/UI Interaction:**
 - List view and edit dialogs.

2.8 Meeting Manager & MoM Action Checklist

- **ID:** FUNC - 008

- **Description:** Log meetings, agenda objectives, minutes of meetings (MoM), and assign follow-up action items with deadlines.
- **UX/UI Interaction:**
 - Meeting scheduling form.
 - Active action item checkbox register with assignee selectors and calendar due dates.

2.9 Risk Register & Change Request Approvals

- **ID:** FUNC - 009
- **Description:** Manage project threats and scope changes.
 - **Risks:** Map title, description, mitigation, probability (High/Med/Low), impact (High/Med/Low), and status (Identified, Mitigated, Occurred, Closed).
 - **Change Requests:** Track scope updates. The Product Owner must review and approve/reject tickets.
- **UX/UI Interaction:**
 - Probability/Impact matrix chart.
 - Pending change requests queue with "Approve" and "Reject" buttons.

2.10 AI Assistant Chat Playground

- **ID:** FUNC - 010
- **Description:** Interactive AI chatbot playground designed to assist BAs. The backend must inject project context (stakeholders, requirements, risks) into the prompt context to generate context-aware user stories, test cases, and mitigations.
- **UX/UI Interaction:**
 - Sidebar chat window with quick-action prompt suggestion pills.

2.11 Confluence Document Publisher & PDF Compiler

- **ID:** FUNC - 011
- **Description:** Compile structured project requirements, stakeholders, and stories into unified documents (BRD/FRD). Allow exporting compiled documents directly as Confluence pages or downloading them as Word (.docx) and PDF files.
- **UX/UI Interaction:**
 - Document preview screen.
 - A "Publish to Confluence" sync trigger button.

- Download buttons for PDF and DOCX.
